

BRAKE CALIPERS

SMOOTH OPERATOR.

100% NEW CONSTRUCTION

Built with all new parts and components to be the equivalent replacement to OE parts in performance and dimensional accuracy. All mating surfaces are precision milled to create a sealed unit that will last long and function under extreme duty conditions.

SYNERGISTIC DESIGN PLATFORM

Precision engineered parts are specified to complement the parts they directly interact with using high grade materials with properties for better performance synergy.

LATE MODEL COVERAGE

Calipers built to new complex design requirements to suit all new model vehicles and support sophisticated sensor systems through vibration condensing and highly responsive feedback.

TESTED

Calipers are tested to the highest level requirements, including extreme pressure leak detection, high cycling durability, piston retraction and residual drag testing, corrosion resistance salt spray.

CUSTOM COATING

Cast Iron - standard in zinc coating, with optional powder coating colors.
Aluminum also has optional powder coating colors available.
