

Environmentally Responsible Packaging Program

WAI Global has for many years been a leader in product recycling and is proud of our Cash for Core programs.

The WAI Cash for Core program yields over 4 million pounds of recycled metal. Additionally 450 thousand boxes are 100% recycled.

We are proud to announce our global packaging initiatives now also includes our range of automotive aftermarket products that will be packaged in 100% recyclable cardboard that is also eco-friendly.

Environmentally Responsible Packaging Program

In support of WAI's global ESG efforts, our eco-friendly packaging program has focused on reducing carbon footprint, impact in waste, and eliminating harmful chemicals. Our teams have successfully implemented the following changes:

- Environmentally friendly packaging does not contain bleach or other harmful chemicals.
- Reduced number of box sizes to help maintain lower inventories and less waste.
- Sourcing raw materials from accredited suppliers who share our commitment to Environmentally sustainable solutions.
- Providing the same solutions to our private label customers and providing stringent guidelines and quality checks to maintain brand standards.
- Our solutions now align with automotive dealers of OE parts - in how they look, and additionally we have also specified environmentally responsible materials.
