

MASS AIRFLOW SENSORS

LOCKED & LOADED.

It's in our DNA

STATE OF THE ART

Multi layered Micro processors provide high speed and accurate information and are able to include additional specialized components to support sophisticated ECU's.

FEATURE RICH

Late model MAFs have included barometer & humidity sensors to increase accuracy and include a wider range of measurements. This improves efficiency and provides instant feedback to enable faster ECU compensations and adjustments.

SUPER SMART

On-board interference filtering discards erroneous measurements from electrical noise - which includes WAI patent #9,441, 994 B2 micro controller technology for signal output quality and precision level.

MASS AIRFLOW SENSORS

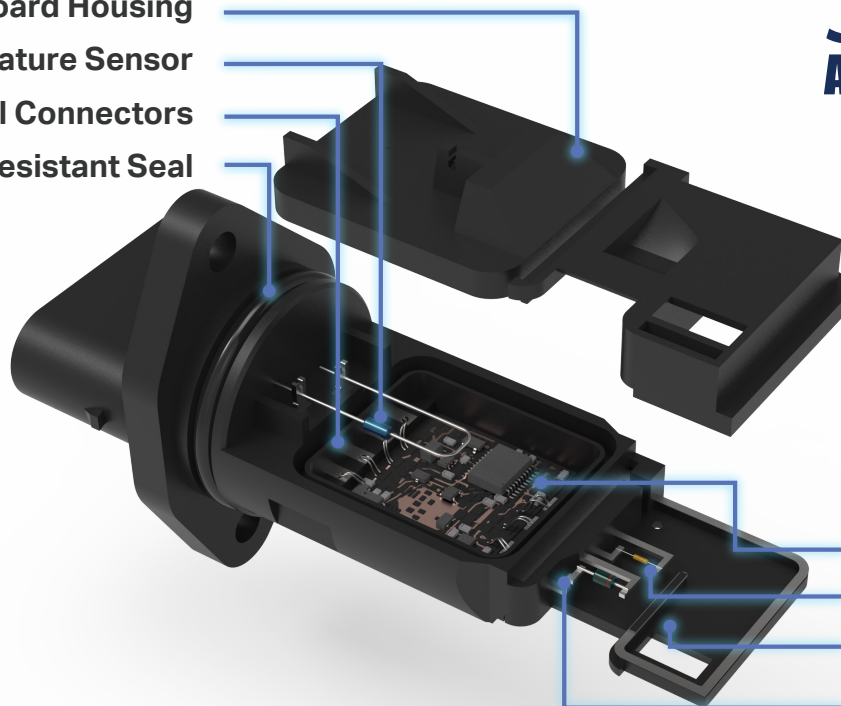

READY TO FIRE.

- Engineered to match original equipment
- Tested and validated to OE standards
- Available on TEC Doc
- 24 Month warranty
- Perfect fit and hassle free installation
