

MAP SENSORS

SMALL BUT MIGHTY.

It's in our DNA

STATE OF THE ART

The standout leader in performance under extreme temperature conditions (-40°C to 120°C).

MICRO MEASUREMENTS

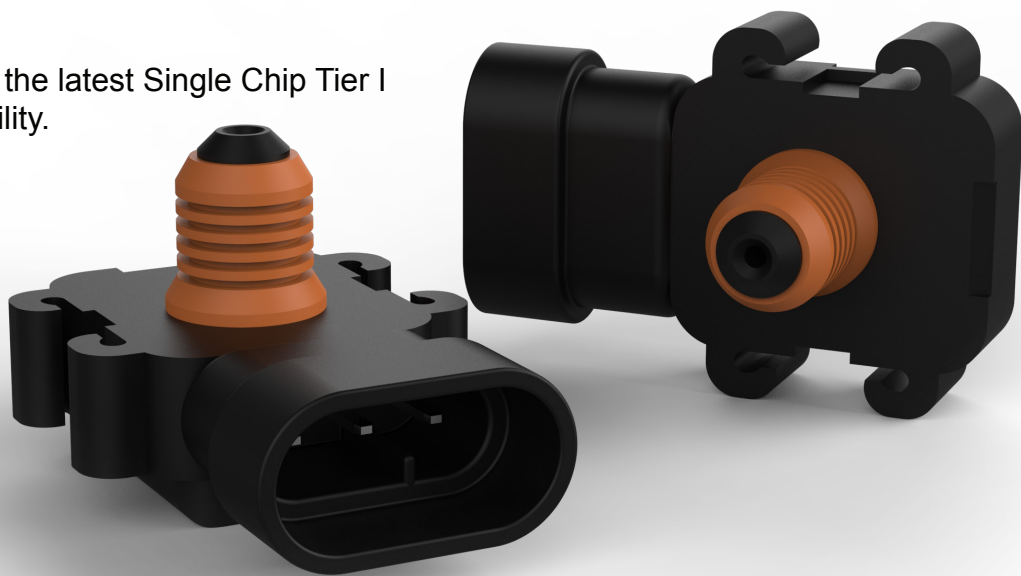

The silicon diaphragm is connected electronically to the ECU and sends signals based on its deviations when air fills or leaves the chamber.

GOOD COMMUNICATOR

The diaphragm will also send barometric pressure readings to the ECU when the vehicle key is first engaged, before the engine starts.

CUTTING EDGE

Sensors come equipped with the latest Single Chip Tier I technology for superior reliability.

MAP SENSORS

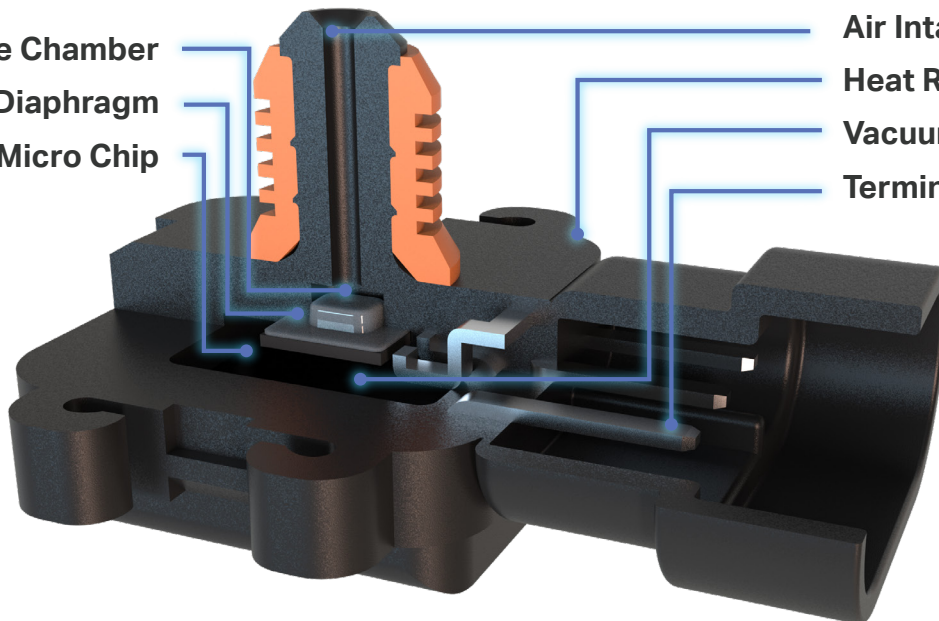

PRECISE.

- Engineered to match original equipment.
- Tested and validated to OE standards.
- Available on TEC Doc.
- 24 Month warranty.
- Perfect fit and hassle free installation.
- Constructed with heat resistant insulation.
