

The Power of WAI

Wiper Motors

Power in a small package.

- Precision milled all metal casting with high density seals stops corrosion in its tracks.
- High temp grease and lubrications perform in extreme weather conditions.
- Continuous motor control for high speed and low speed revolutions.
- Overcurrent protection for debris or wiper movement obstruction.
- Built in rain sensor controls wiper speed.

Lightening Fast.

PLUG & PLAY

- LIN2 technology modulator automatically adapts to vehicle communication protocol.
- Ready to install - 100% All new construction.
- Contains pulse boards, mounting grommets crank arm where required.
- Optional rain sensor & steering column control module.

WAI, A USA COMPANY

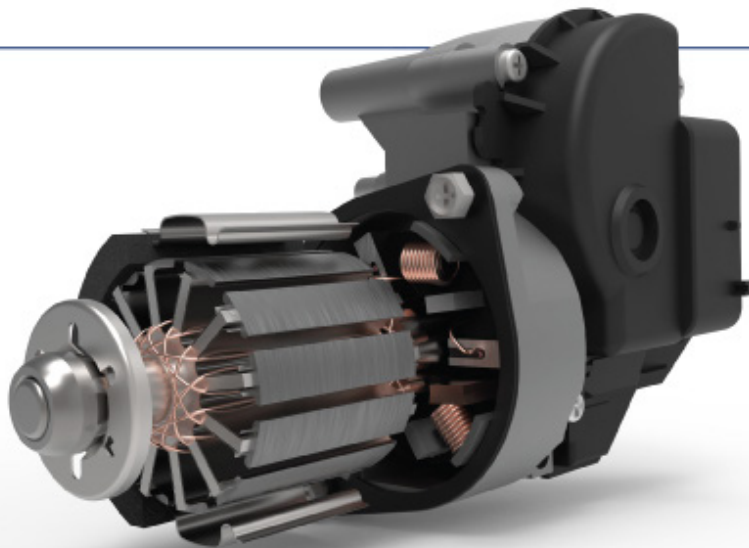

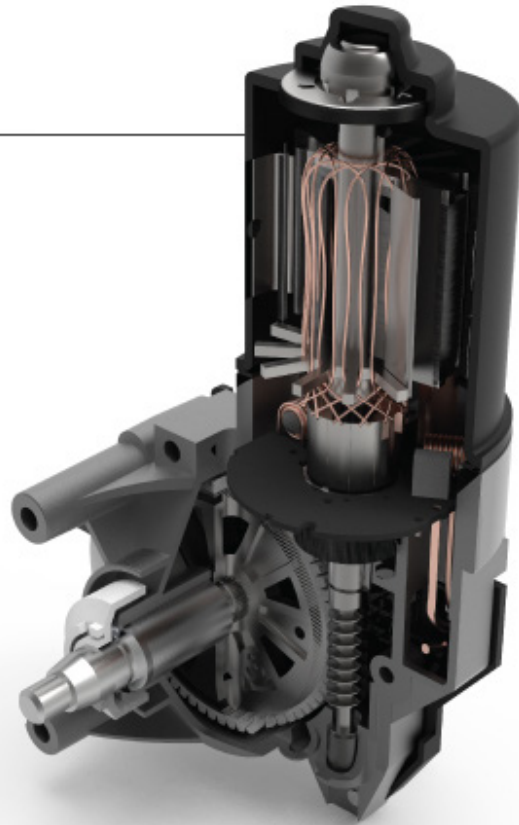

Built with Grit.

SET AND FORGET

- Precision milled all metal casting with high density seals stops corrosion in its tracks
- High temp grease and lubrications perform in extreme weather conditions
- Continuous motor control for high speed and low speed revolutions
- Overcurrent protection for debris or wiper movement obstruction
- Built in rain sensor controls motor speed

The Strong, Silent type.

Unrelenting Strength – with a soft touch

- Composite High strength Gears and Cogs
- High Performance Permanent Magnets
- Heat dissipation & corrosion free chambering
- Designed, Tested and Verified to meet or exceed OEM test protocols
